## Food & Drink Overview

The food and drink industry covers agriculture and fishing, food and drink manufacturing, distribution and warehousing, wholesaling, retail, foodservice and catering. It is the largest manufacturing sector in the UK and accounts for over 15% of total UK manufacturing.

It involves companies that grow, source and produce ingredients; process, preserve and package products; research and design products; taste test, market and transport products to customers and also a whole range of companies at the customer interface.

There are 109 Food & Drink businesses, employing 1,761 people located in the Luton City Growth area. This is effectively 4% of all people employed in Luton, and 3% of Luton's businesses.

The overall number of food and drink employees is increasing by 5% per year, whilst challenges from low cost economies overseas has seen increasing competition – resulting in a decrease of 7.2% of businesses per year. This is partly due to many mergers and acquisitions in recent years, as companies reposition themselves against the competition.

Many small and medium sized organisations have also strengthened their positions and improved their margins by catering for specialist food and niche market products eg high quality, local, organic produce. New technology and more cost-effective methods of production can help food and drink businesses drive forward, and the world wide web now means even the smallest companies can reach a far wider customer base through the Internet.

Media and government attention to the issue of obesity in the UK has seen the growth of an increasingly more health conscious, indulgent customer base looking for new, healthier experiences for which they are willing to pay a premium. Companies in the Luton City Growth area benefit from proximity to the London market, which houses a large and rapidly growing, relatively wealthy market for food and drink products.

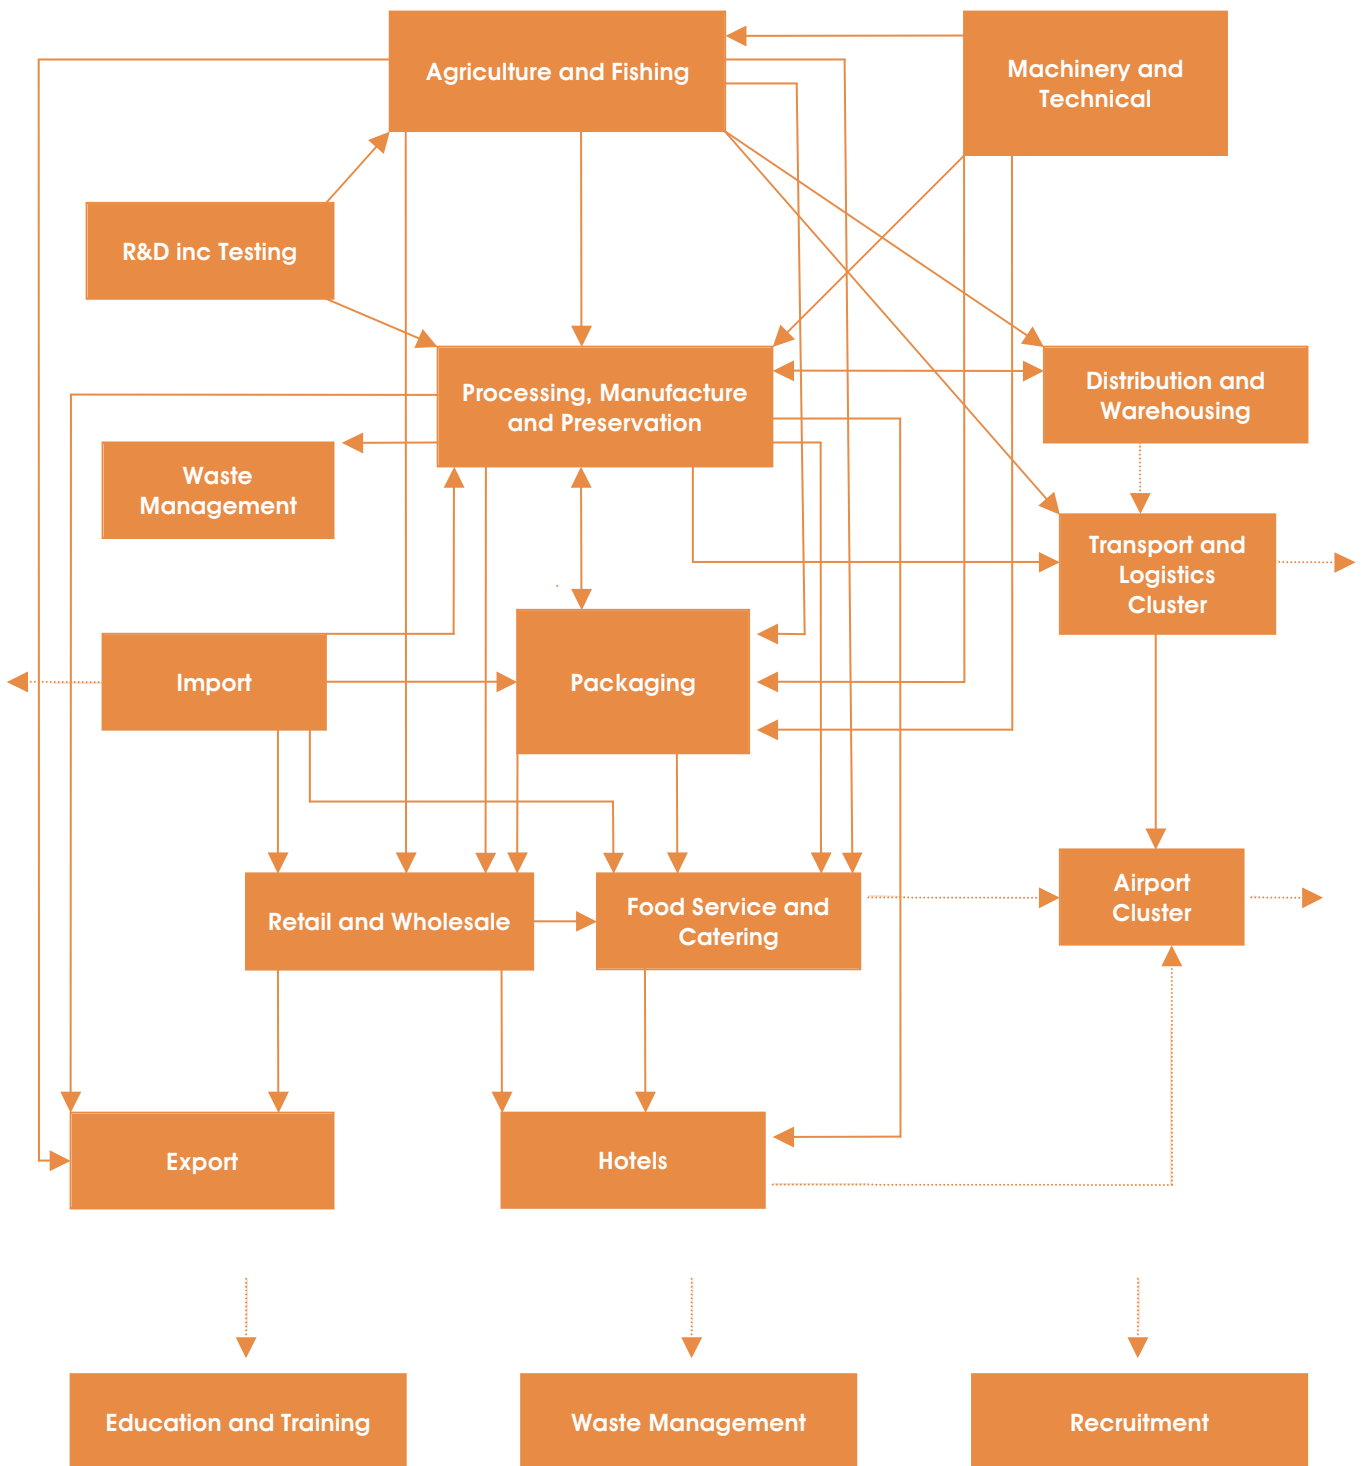

Most people today have exceedingly busy lifestyles, a factor which presents opportunities for the uptake of more food and drink products and services "on the move" – this is a great opportunity for new product and service innovation. The ethnic food industry has demonstrated a tremendous impact in changing Britain's tastes, and has opened the gateway to a demand for ever more exotic and innovative products to the great British public.

Companies in the Luton City Growth area also benefit from the fact that they are located close to London Luton Airport, with an opportunity to add value to imported food and drink as it arrives in the UK.

These factors combined will help to achieve a predicted annual growth rate of 0.8% for companies in Luton and Bedfordshire.

**Top Nosh Catering Ltd**

Top Nosh Catering has been established since 2004 and has been very successful in providing a high quality and attentive service at an affordable price for corporate catering and for private individuals needing something a little special.

The aim of Top Nosh Catering is to create an individual menu that meets all expectations. As well as providing for corporate catering we specialise in most other events such as buffets, dinner parties, canopy events, barbeques, weddings, bar mitzvahs, christenings and birthdays; the list is endless. If it's not listed, - ask. With our experience and your desires we can create heartwarming and mouthwatering experiences whatever the occasion.
